

ISARM2021
CONFERENCE
6 - 9 DECEMBER 2021

TRANSBOUNDARY AQUIFERS: CHALLENGES AND THE WAY FORWARD

The Second International online UNESCO Conference
is a milestone in advancing the knowledge on shared
groundwater resources.

200

Speakers

1K

Participants

The conference provides a unique opportunity
to understand progress achieved over the past
10 years and contributes to the achievement of
the SDG 6 and the monitoring of the indicator
6.5.2 on cooperation on transboundary waters.

Several high-level debates will
explore how science can influence
policy for the sustainable management
of transboundary aquifers resources and
will look at evolution in water cooperation.
